

World Environment Day 2026

Climate Change

World Environment Day, celebrated every year on June 5, is a day focused on raising global awareness on environmental issues and encouraging action to protect our environment. World Environment Day has over 143 countries taking part each year to tackle the most pressing environmental challenges of our time.

In 2026, the focus is on 'Climate Change', a critical issue already impacting operations, supply chains, and communities.

In Australia, rising temperatures, extreme weather, and changing conditions are affecting the way we work and live. Greenhouse gas emissions from energy use, transport, and daily business activities largely drive climate change. This means organisations have a key role to play in reducing impact.

Simple actions across our workplaces can make a difference, improving energy efficiency, reducing fuel use, minimising waste, and making more sustainable choices in day-to-day operations.

World Environment Day 2026 is a reminder that climate action starts with us, at work, on site, and in every decision we make.

What can you do to support World Environment Day 2026?

Switch off — lights, equipment, and air conditioning

Sustainable Procurement — procure goods & services from sustainable companies

Rethink travel — choose virtual or lower-emission options

Cut waste — reduce, reuse, and avoid unnecessary materials

Drive change — support and promote sustainable practices in your team

Speak up — share ideas and take action on climate initiatives
